

THE DIAMOND APPROACH

Deepening into Essential Will

INTRODUCTION TO THE DIAMOND APPROACH

Our basic spiritual orientation is love for the Truth. However, this orientation confronts us with the fact that inner exploration often brings up formidable difficulties. These can challenge our ability to stay open and engaged with our work. What is needed now is our Essential Will. *"Our Essential Will is actually effortless, complete spontaneity, complete letting go. It is surrender. People think that to surrender is to let go of your will. This is not true. To surrender is to have your will completely, objectively."*

~AH Almaas~

Join us all day Saturday to learn about our Essential Will and what tends to prevent our access to it.

To support your process with this teaching a small group led by a Diamond Approach teacher will follow on Sunday. This format offers an opportunity to practice Inquiry, the primary practice of the Diamond Approach.
