## *Ongoing Diamond Approach Group in Asia*

We are happy to announce the launch of Diamond Heart Asia, an ongoing retreat group in Asia which will start June 2018.

This will be an ongoing group that meets once a year in person for 7 days. The retreat will include presentations of the teaching, small inquiry groups led by a teacher, and individual sessions with a teacher.

Group members will also have the opportunity to engage the teaching through various online formats: presentations by experienced teachers, small inquiry groups in which to practice the art of inquiry in a

group format, and one-on-one sessions where students can do personal inquiry with a teacher.

The in-person, 7-day format will allow students to make personal contact with the teaching, the teachers, and each other, all of which will help to create a deep field of presence for our work together. And our online meetings, which bridge the gap between our in-person retreats, will provide a continuum of support for deepening our work, allowing the field of presence that naturally happens through inquiry of this kind to penetrate our daily lives at home and at work.
